

MOHITH R

AI/ML Engineer — Full Stack Developer

rmohithrrrr@gmail.com — +91 6381930988 — India

<https://www.linkedin.com/in/mohithr3/> — <https://github.com/LEGIONM3> — <https://mohithr-portfolio.vercel.app>

Professional Summary

Aspiring AI Engineer with strong foundations in Artificial Intelligence, Cybersecurity, and Full Stack Development. Experienced in building scalable AI systems, agent-based workflows, and real-time applications across diverse domains. Hands-on exposure to vulnerability assessment, network security, and intelligent automation techniques. Skilled in leveraging modern frameworks and tools to design efficient, production-ready solutions. Passionate about developing secure, intelligent, and impactful systems for real-world challenges.

Education

Chettinad College of Engineering & Technology

B.Tech in Artificial Intelligence and Data Science

Expected Jul 2027

CGPA: 8.39

Bharani Vidhyalaya Senior Secondary School

Class XII (CBSE)

2023

81%

Technical Skills

- **Languages:** Python, JavaScript (MERN), SQL, C++
- **AI/ML:** RAG Pipelines, Agentic AI, PyTorch, OpenCV, Gemini API
- **Cybersecurity:** Network Analysis, Vulnerability Assessment, MITM, Phishing
- **Tools:** Git, Docker, Kali Linux, Wireshark, VirtualBox, Nmap

Experience

Cyber Security Intern

VOIS — Remote

Mar 2026 – Present

- Built and configured virtual labs using Kali Linux and VirtualBox for attack simulations.
- Performed network analysis using Wireshark, Nmap, and SET toolkit.
- Developed a Python-based port scanner and applied AI for threat detection.

AI/ML Engineer Intern

IBM (AICTE Affiliate) — Remote

Jan 2026 – Present

- Designed RAG pipelines and agent-based AI systems for real-world applications.
- Built LLM-based automation workflows for contextual decision-making.
- Explored deep learning and deployment strategies via IBM SkillsBuild.

Full Stack Developer Intern

IBM — On-site

Sep 2025 – Oct 2025

- Developed MERN stack applications with integrated frontend and backend systems.
- Designed REST APIs and optimized databases using MongoDB and SQL.
- Built responsive UI components in an agile environment.

Key Projects

Tenali AI – Repository Analysis & Learning Platform

AI, MERN, RAG

Developed an AI-powered platform for repository analysis and interactive learning. Integrated features like AI chat, structured learning paths, and assessments for developers. Built scalable pipelines to process repository data and generate contextual insights.

AI Internship Finder (Agentic RAG)

Python, Streamlit

Built an intelligent system to automate internship discovery using semantic search. Designed agent-based workflows to retrieve, evaluate, and rank opportunities. Improved relevance through contextual scoring and multi-agent coordination.

Live Violence Monitoring System

PyTorch, FastAPI

Developed a real-time deep learning-based system to detect violent activities in video streams. Integrated alert mechanisms and secure APIs for monitoring and response. Optimized performance for accuracy and low-latency processing.

Achievements & Certifications

- Participant – Niral Thiruvizha 3.0 (AI Hackathon)
- Participant – AI for Bharat Hackathon (AWS)
- IBM AI Fundamentals, Python (HackerRank), Cybersecurity (VOIS)
- IBM Z Datathon 2025 Participant
- JLPT N5 Certified (Japanese)
